

Cargo  Fly

## ABOUT US

We are young and dynamic freight forwarder with trained staff oriented on customer's needs. Our goal is to be with our customers on their way to success. We are not familiar with the word „impossible“ or we „can not“ because we love to think that anything is possible and it's our motivation to find suitable and smart solution for anyone and any shipment.

We offer full range of logistics services in the Czech Republic. Cargo Fly main office is located in Prague, close to Prague Airport, warehouses and to CFS facilities. Our strength is our wide network and possibility to offer door-to-door shipments.

## AIR FREIGHT

Air freight is reliable and the fastest way to ship your cargo to your customers worldwide. Your shipment may consist of small spare parts, general cargo, machines or their parts. Air freight is the best way to ship anything that needs to be delivered in short time.

Team of our highly experienced experts is ready to take care of your cargo anytime. Pick up, packaging, customs clearance, transport to the airport, labelling and cargo

handling is something we are really good at. We are ready to convince you that logistics can be smart and done with smile on our faces. Our team is instructed on dangerous goods shipment on regular basis and we can also take care of your VAL and PER goods. We cooperate with all handling providers on Prague Airport, with all GSA and IATA agents. Thanks to our partners we can offer direct flights or flights via one of European HUBs to any corner of the world.

## SEA FREIGHT

Sea freight is cheaper than Air freight but more time consuming. Sea freight is suitable for large and heavy packages as well as packages that does not have to be shipped express. There are several types of containers that can be used for your cargo. For example, dry container, tank container, open top container, cooling container.

As much as we love Air freight we are more than happy to provide you sea freight

shipments. We can reliably and effectively transport FCL (Full Container Load) via Hamburg, via Bremerhaven and via Koper. We can transport smaller packages with LCL (Less than Container Load) to every harbour of the world via CFS (Container Freight Station) Prague. We cooperate with world's top shipping companies and all co-loaders located in the Czech Republic.

## SPECIAL SERVICES

Your company and your needs are unique like your product is special for your customer. You don't require standard or usual service. You need to have a feeling that all our staff works just on your case. You are satisfied only with high level of service, white glove solution, just in time regime and precious GOH (Garment on Hanger) logistics.

We love challenges more than anything else. Urgent transports, moving, white glove service, shipment of expensive clothes, hand

carry and oversized cargo is something we feel really strong at. Seeking solutions and conquering challenges is what moves us forward. We seek smart and economic solution for your transport. Our team is certified for shipping of dangerous goods by air (DGR), overland (ADR) and oversea (IMO). We offer professional consultation, safe packaging, labelling and appropriate paperwork.

WE FLY HIGH

## LAST BUT NOT LEAST

### RAIL FREIGHT

Rail freight is fast and up-to-date way of transporting cargo in containers from China to Europe and back via Silk Road. It is often faster and cheaper than Air freight. Disadvantage of rail freight is that it is very sensitive to political conditions as well as weather conditions, that may not allow shipment of some types of goods. We offer connection for FCL and LCL via Wien, Hamburg, Lodz and Warsaw mainly to Zhengzhou and Suzhou and back.

### CUSTOMS

For import cargo we provide customs clearance, tariff classification, controlling of declared goods, payment of duties and consulting.

For export cargo we provide customs clearance and issuing Carnet ATA, EUR1 or ATR1 documents.

### ROAD FREIGHT

There is no logistics without trucks. They are everywhere, full, empty, riding across Europe and the world. They are the foundation of logistics and we are really good at them.

### WAREHOUSING, VALUE ADDING WAREHOUSING

We offer short-term as well as long-term storage in tempered warehouses guarded by CCTV and 24/7 security. We are not afraid of transshipment of trucks and containers and we are also experienced with operation of warehouses.

We are strongly orientated on tailored solutions in value adding like complementation, controlling, labelling, packaging and delivery. We have experiences with storage and distribution of GOH (Garment of Hanger).

The logo for Cargo Fly, featuring the text "Cargo Fly" in a white, sans-serif font. The letter "o" in "Cargo" is replaced by a white icon of an airplane in flight, angled upwards and to the right. The background of the entire image is a stylized world map with a dark blue background and light blue outlines for continents and countries. The Czech Republic is highlighted in a solid red color, indicating its location in Central Europe.
